SEED AND FERTILIZE AT THE SAME TIME.

Stainless Steel Meters

Featuring all stainless steel and non-corrodible components, Concord's stainless steel meters are virtually maintenance free and come standard. Simple to use, the meters deliver seed and fertilizer precisely and gently to your air drill or any other seeding tool or fertilizer applicator on your farm.

- › **ISO Compliant Variable Rate or Ground Drive Metering**
- › **Simple and Precise Calibration; Easy Access for Setting**
- › **Shut-Off Slide Isolates the Meter from the Tank**

High-Capacity Tanks

The two tank compartments are split 60/40. Model 2800 has a total capacity of 280 bushels (112 front/168 rear), while the 3350 holds up to 335 bushels of material (135 front/200 rear) between both tanks.

Stainless Steel Tanks

Not only are Concord's stainless steel tanks durable and non-corrosive, but they also don't sweat, reducing the condensation that can cause seed and fertilizer to cake up in poly tanks. Additionally, there is no static electricity to impact product delivery.

OUR LEGACY. YOUR FUTURE.

ISO Compliant Electronic Controls

The user-friendly ISO compliant electronic control unit monitors a wide variety of important cart functions. Operators can control rates from the cab or load a map for variable rate seeding and fertilizing. The system is compatible with most in-cab ISO terminals, but is optimized for seamless use with the field-proven Raven® CR7™ and Viper® 4+ terminals. Hydraulic driven models are also provided with a remote calibration keypad as standard equipment, allowing operators to calibrate the machine without having to run back and forth between the tanks and tractor cab.

Monitor Functions: > Fan Speed > Bin Levels > Meter Status > Blockage > Ground Speed
> Section Switch Box > NH₃ Application > Acres Seeded > Application Mass/Volume > Lifetime Totals
